

Appendix IV - CFMG performance index scores

Community Forest Management in Zambia: Is It Working?

Table 1: Mean performance index scores for each CFMG across the four thematic areas. Governance scores (0–10) are based on executive FGD responses only and count the number of ten governance features present. SFM, economic transformation, and equity and inclusion scores (0–5) are averaged across all four FGD types (executive, female, male, youth). Higher scores indicate better performance.
