Foreword

[Foreword text to be inserted]

Acknowledgements

This activity is a partnership between Landscape Alliance and the SAFE (Sustainable Agriculture for Forest Ecosystems) project, financed by the European Union (EU), the Ministry of Foreign Affairs of Netherlands and the German Federal Ministry for Economic Cooperation and Development (BMZ). SAFE is part of the Fund for the Promotion of Innovation in Agriculture (i4Ag) and implemented by Deutsche Gesellschaft für Internationale Zusammenarbeit (GIZ). The aim of this collaboration is to understand whether community forestry in Zambia is delivering the desired outcomes in terms of sustainable forest management and rural economic development.

The activity is also a collaboration between Landscape Alliance and the Government of the Republic of Zambia through the Ministry of Green Economy and Environment and the Department of Forestry.

The authors would like to thank the District Forest Officers, CFMG Executives and traditional leadership from the surveyed communities for helping to coordinated the survey. We would also like to thank the Focal Group Discussion members and individual interviewees for giving up their time and contributing to the success of the survey. The authors would further like to acknowledge Sam Harrison and Casey Ryan, both from the University of Edinburgh, UK, for generously contributing the forest biomass data that were used in the remote sensing chapter. The team would like to thank the colleagues at the Landscape Alliance for their logistic and administrative support, especially Miambo Malesu (Country Co-ordinator, Zambia) who

was responsible for all the managerial roles in supporting the team. We would like to thank the participants at the inception workshop, who contributed their expertise and advise freely and greatly improved the design of the study, as result. Last, we would like to thank Alastair Anton (ZIFLP), Anne Larson (Landscape Alliance) and colleagues from GIZ, the EU delegation in Zambia, and the Landscape Alliance for reviewing and commenting on draft versions of the report.

The contents of this report are the sole responsibility of the authors and the Landscape Alliance do not necessarily reflect the views of the EU, the Federal Ministry for Economic Cooperation and Development (BMZ), the Ministry of Foreign Affairs of the Netherlands, or the Government of the Republic of Zambia.

Contents

Chapter	Title
Summary	Summary of findings and headline conclusions
Recommendations	Recommendations for government, NGOs and carbon developers
Introduction	Background, policy context and study objectives
Survey Overview	Survey design and sample characteristics
Governance	Analysis of survey data on CFMG legal, governance and business processes
Sustainable Forest Management	Analysis of survey data on forest condition and SFM outcomes
Remote Sensing Analysis	Analysis of Earth observation evidence on fire, deforestation and biomass change
Economic Transformation	Analysis of survey data on employment, income, carbon finance and forest enterprises
Equity and Inclusion	Analysis of survey data on benefit sharing, gender equity and poverty impacts
Discussion	Synthesis of study results and cross-cutting findings
Appendix I – Methods	Detailed account of analysis methods
Appendix II – Survey tool	Survey instrument
Appendix III – List of CFAs surveyed	Summary details of all community forests in the sample
Appendix IV – CFMG performance index scores	Governance, SFM, economic and equity index scores for each CFMG surveyed

Abbreviations

Abbreviation	Definition
BCP	BioCarbon Partners
BMZ	German Federal Ministry for Economic Cooperation and Development
CFA	Community Forest Area
CFM	Community Forest Management
CFMG	Community Forest Management Group
CLMM	Cumulative Link Mixed Model
COMACO	Community Markets for Conservation
CRB	Community Resource Board
DFO	District Forestry Officer
EU	European Union
FAO	Food and Agriculture Organization of the United Nations
FD	Forestry Department
FGD	Focus Group Discussion
FPIC	Free, Prior and Informed Consent
GIZ	Deutsche Gesellschaft für Internationale Zusammenarbeit
GLMM	Generalised Linear Mixed Model
GRZ	Government of the Republic of Zambia
HFO	Honorary Forest Officer
i4Ag	Fund for the Promotion of Innovation in Agriculture
JFM	Joint Forest Management
MoA	Ministry of Agriculture
MoGEE	Ministry of Green Economy and Environment
NDC	Nationally Determined Contribution
NGO	Non-governmental Organisation
NTFP	Non-timber Forest Product
PACRA	Patents and Companies Registration Agency
REDD+	Reducing Emissions from Deforestation and forest Degradation
SAFE	Sustainable Agriculture for Forest Ecosystems
SFM	Sustainable Forest Management
SI	Statutory Instrument
ZIFLP	Zambia Integrated Forest Landscape Programme
